Quick-Reference Guide to
Disabling SIP ALG on Common Firewalls & Routers

COMPANY	INSTRUCTIONS
SonicWall	In SonicWall SIP ALG is called SIP Transformations. In the SonicWall admin panel choose *VoIP*, then *Settings*. Uncheck the box *"Enable SIP Transformations."*
WatchGuard	SIP ALG is disabled by default. WatchGuard SIP ALG is set up individually as proxies. For further information, see documentation.
Cisco (SIP Fixup)	Cisco's Sip Fixup must be disabled through the CLI. For routers, run these commands: *enable* *configure terminal* *no ip nat service sip udp port 5060* *no ip nat service sip tcp port 5060*
PFSense (Siproxd)	Siproxd is not enabled by default, but must be installed as a separate package. Refer to documentation for troubleshooting. Other settings, like source port rewriting, may be causing SIP issues.
Linksys	In admin panel click *Advanced.* Uncheck *"SIP ALG."* Some Linksys products may have different admin pages. Refer to support website for further information.
NETGEAR	In the admin panel, click the *Advanced* tab and expand *Setup.* Uncheck *"SIP ALG."*
Ubiquiti	In the *config* tree follow this path: *system → conntrack → modules → sip → disable*
Fortinet	Disabling VoIP inspection and SIP session helper requires multiple steps. See documentation.
